Availability of Fishplates for K-mast fixing angle

A :

Potain distribution network

Dear partners,

To continue the fight against counterfeiting and to ensure the safety of the products you use, Potain has taken the following decision when it comes to fixing angles for K masts (example : P41, P61, P854 ...), and more specifically to their "fishplates" (there are various names for those parts, they can be called "spigots" or "block joint" as well)

As of February 1st, 2023, it will no longer be possible, thru the parts processes or systems, to order fishplates (kit of 4) without ordering any matching sets of 4 fixing angles.

As you know, counterfeit parts do not follow the exact same specifications as our "Original", and don't pass the same validation tests which finally represents safety risks for the end users and for the OEM.

We cannot endorse this practice by selling fishplates alone that may in the end be used with counterfeit fixing angles which are not compliant with Potain specifications. Fishplate kits will therefore only be available by ordering a complete set of fixing angles.

To keep competitiveness, we strongly recommend you recover fishplates where you can, after any jobsite.

As well, in case you get information about counterfeit fixing angles, or if you are approached to buy some, we expect that you pass that information to us.

We thank you for your understanding and expect you to encourage your customers to only buy original.

To continue to preserve,

Your Potain Spare Parts team.
